Serbian - Native

EDUCATION

IT Bootcamp
Web Page Development
2019 October - December

High School, Barajevo
Economics Technician
2010 - 2014

ABOUT ME

I have been interested in programming since my childhood when I attended programming school for kids. In the past few months I started learning web development intensively using The Odin Project platform and later at IT Bootcamp school. Besides building some simple personal projects and ones listed on GitHub I don't have professional working experience.

< > PROJECTS

TRGOVAC and FORUM are projects I'm proud of. Forum was built using React, and Trgovac was built using React, Express, and PostgreSQL. My other projects can be seen on my GitHub profile. My portfolio site can be seen on this LINK.

HOBBIES AND PERSONAL CHARACTERISTICS

I enjoy playing football with friends from my neighborhood, but because of the current pandemic, we're not actively playing it at the moment. I also enjoy reading articles about mathematics and physics. Now and then, I give physics classes.
I have good work habits and I am very organized, systematic and persistent in my work responsibilities, which I have shown in various occasional jobs during my studies.
